## EXPERIENCE

### FrontEnd Internship

04/2023 - 07/2023

While studying my bachelor education, we had a course where we had to pursue our career in any organisation regarding our related IT Field. So, i also had join the program for 3 months where i:

1. Learned React as front end technology by doing different easy to hard projects.
2. Later, Enhanced my skill as a whole in backend too.
3. Built my teamwork and communication skills by collaborating and asking for help in needed with different team members.

### Sales Representative

03/2019 - 04/2019

After i completed my +2, i had join the IELTS class which i had to attend during morning time only, so i was pretty much free and found the job in social media platform where i had to:

1. Communicate with different customers and sell the products by giving the brief description about the products.
2. Sometimes built the different content by my own to do digital marketing.

## PROJECTS

### Freelancing Websites

<https://github.com/siddhartha0/Freelancing>

By combining all the technologies and techniques i learned during my internship and the bachelor programme i had build this project as my final year project.

The main goal was to help people find exactly what they are interested in and help the people stopped from being scammed in job. The new technologies that i learned were:

- State Management (Redux Toolkit)
- Paypal Integration

### Food Ordering Websites

This was the project i built during my mid level knowledge in react. The key thing that i learned from this project were:

- Tailwind css- How easy was it save the time while building the application & making the application responsive.
- MongoDB- How the document based language helps store our data.

### ToDo

This is the project i would do & come back to often. Like every time i learn new things i first implement it building todo application. Like Drag & Drop features, Handling api through redux toolkit only, react with typescript & many more.

### Other projects

Simple E-commerce, Social Media Clone

## EDUCATION

### Bachelor

Sunway School

03/2021 - 02/2024 Maitidevi

### +2

Deerwalk Sifal School

2017 - 2019 Sifal

## SKILLS

### Front End

Html css React Js

### Back End

Node Js Express

Java(Intermediate)

### Database

MongoDB Firebase Sql
